

Learn it step by step, and get unstuck

DNS · 4 OF 7 1 side page

Your phone doesn't know where `example.com` lives. It asks a DNS resolver, which looks the name up and answers with an IP address.

example.com → 192.0.2.10

- Source: RFC 1034, Domain Names: Concepts and Facilities

THE IDEA

Three steps

Make a deck, learn from it, and ask for help on the exact slide where you are lost.

1 Make a deck

Type a topic or use your own notes

2 Learn, then 3 Get unstuck

Slides full screen in landscape. Tap "I don't get this" for a side page.

Amber numbers on the screenshots match the numbered steps underneath them.

Examples use a sample deck on computer network protocols. Content shown is sample content.

FEATURE 1

Your first visit

Three steps, and nothing to set up first. No account needed.

Welcome

- 1 **Type a topic.** The app builds a short deck of slides, each with its source.
- 2 **Read in landscape.** Slides fill the screen. The speaker button reads a slide aloud.
- 3 **Tap "I don't get this".** A cited side page opens for that slide and comes back in Review.
- 4 **Get started** takes you to Learn.

Tip. Everything works offline once a deck is saved.

FEATURE 2

Learn: resume, then your decks

The Learn tab leads with where you stopped.

Learn

- 1 **New deck** starts a deck from a topic. It is one button at the top, always in the same place.
- 2 **Resume** takes you back to the slide where you stopped.
- 3 **Your decks** shows progress on each deck. Tap one to see its slides and sources.

Tip. The weekly goal line under the title shows days done this week.

FEATURE 3

Make a deck from a topic

One question: what do you want to understand?

The screenshot shows a mobile app interface for creating a new deck. At the top is a back arrow and the title 'New deck'. Below this is a text input field with the placeholder 'What do you want to understand?'. The field contains the text 'Computer Network Protocols' and is marked with a yellow circle containing the number 1. Below the input field is a note: 'Rough is fine. You can fill gaps later by tapping "I don't get this".'. Below the note is a toggle switch labeled 'Cites IETF RFCs and OpenStax' with a checkmark icon, followed by the text 'Every slide shows its source' and a yellow circle with the number 2. To the right of this toggle is a 'Change' button. Below the toggle are two buttons: 'Upload note' with an upward arrow icon and a yellow circle with the number 3, and 'Use my course' with a book icon. At the bottom is a large green button labeled 'Build deck' with a right arrow icon and a yellow circle with the number 4. Below the green button is the text 'No account needed. Stays on your phone.'

New deck

- 1 **Type your topic.** Rough is fine. You can fill gaps later with "I don't get this".
- 2 **Sources.** The deck cites IETF RFCs and OpenStax. Tap Change to pick others.
- 3 **Upload notes** or **Use my course** start from your own material. Text is read on your phone.
- 4 **Build deck** starts building.

Tip. No account needed. Everything stays on your phone.

FEATURE 4

Start reading while it builds

You do not wait for the whole deck.

Building your deck

- 1 **Found sources.** The sources the deck will use.
- 2 **Checking each point.** Anything that cannot be traced to a source is left out.
- 3 **Start reading** opens the first slides while the rest arrive. The whole deck saves for offline when done.

Tip. Cancel stops the build and keeps nothing.

FEATURE 5

A deck, slide by slide

See every slide and its sources before you open it.

Deck page

- 1 **Open slides** starts the deck, full screen in landscape.
- 2 **Any slide** opens the deck at that slide. A slide with a side page shows "1 side page".
- 3 **Sources** lists every document the deck cites.

Tip. Held upright, the slide is turned to fill the screen.

FEATURE 6

Read a deck, full screen in landscape

A deck opens like a presentation: one idea per slide, with a diagram.

- 1 **Close** returns to the deck page.
- 2 **Progress.** One segment per slide; the white one is where you are.
- 3 **I don't get this** opens an explanation for exactly this slide.
- 4 **Listen** reads the slide aloud with your phone's own voice.
- 5 **Previous** goes back one slide.
- 6 **Next** goes forward. On the last slide it becomes a tick that finishes the deck.

Tip. All controls sit in one slim bar, so nothing covers the slide.

FEATURE 7

Get unstuck with a side page

Tap "I don't get this" on a slide. An explanation opens beside it, with its source.

Side page, level 1

Level 2

- 1 **Close** puts the side page away and shows the whole slide again.
- 2 **Go deeper.** Opens level 2, a second explanation.
- 3 **Keep for review.** Saves it on this phone. It comes back in Review.
- 4 **Level 2 is the last level.** Go back to level 1, or ask your lecturer or tutor.

Tip. A slide that has a side page shows a small "1 side page" marker.

FEATURE 8

Listen to a deck

Every slide has a short narration, read by your phone's own voice. No audio to download.

Narration on a slide

Settings

- 1 **Speed.** Tap the speed to cycle 1x, 1.25x, 1.5x, 0.75x.
- 2 **Stop listening** ends the narration. Tap the speaker again to restart it.
- 3 **Settings.** Choose whether side pages are read aloud, and turn on data saver.

Tip. Audio supports the text. It never replaces it.

FEATURE 9

Check what you know

Short quizzes, always optional, never a gate.

- 1 **Take the quiz** at the end of a deck. Five questions.
- 2 **Back to Learn** is always there. Skipping never blocks the next deck.
- 3 **Pick an answer.** It is marked straight away, with a line on why.
- 4 **Next question** moves on. You see your result after the last one.

Tip. A finished quiz or review counts toward your weekly goal.

FEATURE 10

Review what you needed help with

Cards built from your own side pages. Try to recall first, then check.

- 1 **Read the question** and try to answer from memory.
- 2 **Show answer.** Reveals the answer from your saved side page.
- 3 **I got it** closes the card. **Side page** reopens the explanation on its slide.

Tip. Later cards and the topic quiz are on the same screen.

FEATURE 11

Weekly goal, settings and profile

A goal for days studied each week, not a daily streak. Missing a day costs nothing.

Me

- 1 **Create a profile** is optional. Email and a 6-digit code, no password.
- 2 **Weekly goal.** Choose 2 to 5 days. Any finished quiz or review counts as an active day.
- 3 **Data saver** and **Download on Wi-Fi only** keep your data use low.

Tip. Learning works without a profile. Progress stays on this phone.

FEATURE 12

Quick reference: finding your way

Three tabs are always at the bottom.

Learn

- 1 **Learn.** Where you stopped, and your decks.
- 2 **Review.** Side pages to recall, and the topic quiz.
- 3 **Me.** Weekly goal, settings and the optional profile.
- 4 **New deck** is at the top of Learn.

Tip. Stuck? Tap "I don't get this" on the slide.
